

### DID YOU KNOW...?

Tracy Community Connections Center collaborates with Sutter Health to provide **recuperative care** for homeless patients. What does that mean?

When a homeless patient is discharged from the hospital, Tracy Community Connections Center steps in to provide emergency shelter, food and clothing for 1-3 days until the patient can move into a more stable environment.

**SUCCESS STORY:** "Bob" suffers from mental illness. A relative had brought "Bob" from Nevada, spent all of Bob's social security money then dumped him at the Emergency Room in Tracy. So "Bob" was referred to Tracy Community Connections Center for emergency lodging after being discharged from the hospital.

Our Case Manager was able to find a supportive living home for Bob the next day. He has since transferred his mental health, social security, medications, etc. to California and is doing fine in his new home.

**Case Managers  
Available  
Monday-Friday 8am-4:30pm
